

Evaluate CDMO Intelligence for Pharma

**Understand the complex Contract Development
and Manufacturing Organization (CDMO) landscape.
Secure the best-fit vendors ahead of the competition.**

The pharmaceutical CDMO market is holding strong, forecast to grow 7.29% annually until 2028. To secure an edge, it's crucial for pharma companies to forge strategic partnerships with the right CDMOs early on.

Does your organisation have the insights to understand contract manufacturing challenges for pipeline drugs well enough in advance?

I'd rephrase this whole bit to: Often, the information available barely scratches the surface, making assessments of CDMOS a challenge. It also impacts your ability to make accurate drug volume forecasts and to align mid-term revenue projections.

This is where Evaluate CDMO Intelligence steps in

Use our time-saving intelligence tool to select the right vendor at the right time. Profile and compare candidates, speed up your projects, and make confident decisions in an evolving CDMO segment.

HOW WE HELP:

Effortlessly profile vendors, compare their strengths and weaknesses, and pinpoint those with the expertise to provide top-quality service.

Access a pool of high-performing vendors that can accelerate your project timelines, reducing the need for lengthy RFIs or RFPs.

Negotiate contracts that are cost-effective without compromising the quality of service you require.

Identify potential competitors, gain insights into their existing relationships, and understand their preferred vendor technologies and ROAs.

EVALUATE EQUIPS YOU TO:

Project revenue with leading drug sales forecasting.

Predict regulatory success through machine learning.

Assess demand with one-of-a-kind drug volume forecasts.
